

Touch Wireless Mouse

Key features

- Low profile wireless mouse with seamless touch sensitive top cover, USB micro receiver and high 1000 DPI resolution
- Touch sensitive top: swipe back and forward through web pages and photos, click, double click, right click, zoom, scroll up/down and tilt left/right
- Including software for changing the touch functionality
- Less mechanical and moving parts for a longer lifetime than regular mice
- Accurate and high precision optical sensor that works on virtually every surface
- 2.4 GHz technology for smooth movement and 8 meter range
- Ultra small USB receiver: Plug it in once and never take it out again
