It is a professional quality, low cost LCR/ESR-meter. It is a perfect solution for testing, identifying components and troubleshooting electronic circuits.

The unique design combines a pair of tweezers like probes and a digital LCR-meter in one compact and lightweight device. The gold-plated precision probes are designed to work with smallest SMT components.

It displays component type and value include a secondary parameter for capacitors and inductors. Automatic component identification and test frequency selection simplifies measurement by elimination unnecessary trial and error time.

Long battery life and extremely low sleep current makes this device and ideal choice for broad spectrum of applications.

Using it provides a quick and convenient way to test, sort and evaluate SMT components and perform on-board measurement and debugging.
