### Kraftform Kompakt

Many professionals work with their tools at both a fixed location, such as a workshop, and at external sites away from their base. Frequently it is only out on site that a decision is made as to whether use a manual or power tool for a particular job.

The unique Kraftform Kompakt tool kits equip the user for both types of operation with just a single set, and as the kits come in rugged pouches with belt loops, they are easily carried wherever needed.
