## Solder Fume Absorber LDA 4

**Power requirements: 220/240V 16W, air throughput: 320m<sup>3</sup>/h, noise level: 36dBA, housing: anodized aluminum, dimensions: 260x230x55mm. Through the use of 4 low noise fans, the noise level amounts to only 36 dBAs. Consequently, the LDA 4 is the quietest absorber on the market. The 4 fans cause an even air throughput over the entire surface of 260x220mm. Through a new technology, we have succeeded in reaching an air throughput of 320m<sup>3</sup>/h with an input of only 16W. The life expectancy of the filter is about 4-6 weeks with a run time of approximately 8 hours per day. Due to the high air throughput with minimal noise development, this unit is suitable for virtually any job.**

תיאור פריט: שואב עשן לעמדת הלחמה – DISTELKAMP LDA 4

יצרן: DISTELKAMP

מיקום באתר: מלחמים ותחנות הלחמה / שואבי עשן לעמדות הלחמה / שואבי עשן לעמדות הלחמה

יבואן: טלמיר אלקטרוניקה בע"מ
