Sherlock ${ }^{\text {m/ }}$

Originally developed for PC monitor applications, this $2.00 \mathrm{~mm}\left(.079^{\prime \prime}\right)$ pitch system can also be used for other applications that require space savings and secure locking features.

The Sherlock ${ }^{T M}$ system contains two sub-families: Sherlock ${ }^{\text {™ }} I$, the original version developed for monitor applications; and Sherlock ${ }^{\text {™ }} I I$, which offers more robust latching and locking features.

The Sherlock ${ }^{\text {TM }}$ system utilizes Molex's proven 50212 (for Sherlock ${ }^{T M}$ I) \& 35476 (for Sherlock ${ }^{\text {M }}$ II) terminals, along with a positive lock housing and straight and right angle headers in 2-15 circuits.

Molex also offers positive lock wire-to-board connectors in $2.50 \mathrm{~mm}\left(.098^{\prime \prime}\right)$, $3.50 \mathrm{~mm}\left(.138^{\prime \prime}\right), 3.96 \mathrm{~mm}\left(.156^{\prime \prime}\right)$ and $7.92 \mathrm{~mm}\left(.312^{\prime \prime}\right)$ pitch.
