

2032-D

Product Overview

Cable finder set in case for live and voltage-free circuits

Functions

- Specific location of cables in the wall, line interruptions, short circuits in lines
- Locating fuses and assignment to circuits
- Finding accidentally plugged plug and junction boxes
- Finding breaks and short circuits in unshielded underfloor heating
- Tracing metallic water and heating pipes

Device information

- Set consisting of encoder and receiver in impact-resistant, robust case
- Display of the encoder signal is visual and acoustic
- Clear and understandable operating instructions with application examples

Device highlights

- All application areas (voltage-free and under voltage) are covered without additional accessories
- Safe localization by displaying a defined letter on the receiver
