- Keystone in proven ROLINE quality!
- The ROLINE Cat.6A Keystones are ideal for use in Gigabit Ethernet networks. They support data transfer rates up to 10 Gbit/s with a bandwidth of 500 MHz.
 - Connect the cable to the Keystones via LSA connections without special tools - place the cable ends simply into the guides (with color coding), close and compress the module - the connection is ready for use.
 - The Keystone modules can be "latched" into a 19" module support rack, which is optionally available in black (26.11.0357) or light gray (26.11.0356). Or in combination with a module receptacle (25.16.8579) you can realise a junction box.
 - The Keystones are coded according to EIA/TIA 568.
