

Features:

Label Type: Self AdhesiveLabel Size: 16x38mm

• Material: Gloss Paper with backing paper for all reel stock applications, suitable for automatic dispensing

• Adhesive: General purpose, strong permanent

Colour: Yellow with black print
Pack qty: 1,000 labels per reel
Design: Industry standard design

BACKING PAPER	Honey Glassine 65 Yellow transparent glassine backing paper Backing paper for all reelstock applications suitable for automatic dispensing		
	Test Method:	Value:	Units:
Substance	ISO 536	60	g/m²
Caliper	ISO 534	53	microns
Tensile Strength MD	ISO 1924	6.3	kN/M
Tensile Strength CD	ISO 1924	2.4	kN/M
Transparency	DIN 53147	50	%
Warranty	Our recommendations are based on our most current knowledge and experience. As our products are used in conditions beyond our control, we cannot assume any liability for damage caused through their use.		
ADHESIVE			ng non-polar surfaces, films and cor- ance.

	Test Method:	Value:	Units:
Tack min	FTM9	14	N
Shear Min	FTM8	1.0	h
PE-Looptack Min	modified FTM9	10	N
Labelling Temperature Min	-	0	°C
Service Temperature Min	-	-20	°C
Service Temperature Max	-	80	°C
Limitations	Not recommended for labelling highly curved surfaces.		
Additional Info	Approval: The research centre ISEGA has given the adhesive approval for direct contact with dry and moist non-fatty foods.		
Shelf Life	From the date of manufacture 4 years in +20 °C and RH 50%.		
Warranty	Our recommendations are based on our most current knowledge and experience. As our products are used in conditions beyond our control, we cannot assume any liability for damage caused through their use.

ACCIDENTAL RELEASE MEASURES Personal Precautions Prevent large spillage from entering drains, ditches and rivers by the use of sand or earth. Inform local authorities/ Fire Service at once if this cannot be prevented. Contain and absorb spillage using earth, sand or other inert material. Transfer to suitable containers for disposal. When the spillage has been cleared, flush the contaminated area thoroughly with water. PHYSICAL & CHEMICAL PROPERTIES Appearance/Odour Boiling Point/Range Appearance/Odour Boiling Point/Range Boint N/A. N/A. NyA. NyA. NyA. NyA. Not determined. Viscosity Physically 1.05 - 1.40 at 20°C. Completely miscible. Similar to water. Viscosity Physically 1.05 - 1.40 at 20°C. Solubility in Water Similar to water. Viscosity Physically 1.05 - 1.50 at 20°C. Solubility Stable under normal conditions. Do not allow to freeze. Decomposition TOXICOLOGY INFORMATION Acute Toxicity Slaim Repeated or prolonged skin contact may cause drying and cracking. Liquid may cause slight eye irritation. No not stomach acids on some inks could release toxic gases. No long term effects No long term effects expected.	FIRE FIGHTING MEASURES Extinguishing Media Protective Equipment Exposure Hazards	Not required. Waterspray, foam, dry chemical or carbon dioxide may be used on adjacent combustible materials. Self contained breathing apparatus in severe fire conditions. If involved in large fire, may decompose releasing irritant/toxic fumes.
Prevent large spillage from entering drains, ditches and rivers by the use of sand or earth. Inform local authorities/ Fire Service at once if this cannot be prevented. Contain and absorb spillage using earth, sand or other inert material. Transfer to suitable containers for disposal. When the spillage has been cleared, flush the contaminated area thoroughly with water. PHYSICAL & CHEMICAL PROPERTIES Appearance/Odour Boiling Point/Range Flash Point N/A. Autoignition Temperature Vapour Pressure Density Typically 1.05 - 1.40 at 20°C. Completely miscible. Similar to water. Viscosity Variable. 8.5 - 9.5. STABILITY & REACTIVITY Stability Conditions and Materials to Avoid Hazardous Products of Decomposition TOXICOLOGY INFORMATION Acute Toxicity Oral LD50 (rat) > 2,000 mg/kg. calculated from toxicity information on constituent products. Repeated or prolonged skin contact may cause drying and cracking. Liquid may cause slight eye irritation. No effects expected from inhalation at ambient temperature. Accidental ingestion of injurious quantities is unlikely. Action of stomach acids on some inks could release toxic gases.		
Environmental Precautions can authorities/ Fire Service at once if this cannot be prevented. Contain and absorb spillage using earth, sand or other inert material. ECOLOGICAL INFORMATION	
Mobility	Disperses rapidly in water. Viscosity of ink would prevent it from readily penetrating
	soil.
Persistence and Degradability	The resin components are readily biodegraded but, in general, the pigments are not.
Bio-accumulation	Information not available.
Ecotoxicity	Information not available.
