

TENMA Brand Soldering Irons and Tip data sheet

General purpose soldering irons

The iron features a small barrel to handle ratio, enabling users to manouver easily for better control when soldering. 100% impact resistant handle assuring well built, long lasting quality. Seamless stainless steel barrel restrains heat expansion, protecting the internal heater, and ensuring a long life for the heating element. Supplied with a metal sheet stand.

Industrial soldering irons

The iron is designed for high power soldering jobs which require heat retention at the tip. Available in 100W and 200W, thess irons are useful mainly for soldering metal sheets, or as a branding tool. It can also be used to cut vinyl canopy fabric. The high quality heater element ensures a long life. It features an ON/OFF switch on the handle and is fitted with a Copper tip. Supplied with heavy duty sturdy stand.

Replacement tips

Cross section of Long Life Tip

Long life tips are excellent heat conductive soldering tips made from pure copper. They are iron-plated making them multiple times more durable than regular copper tips. They are chrome-plated on the outside and therefore are corrosion free. The tip is factory pre-tinned which improves the performance of the tip. Note: Long life tips cannot be filed as this will damage the tip structure.
